(2004). Corporate Support (2004). *Geoscience Canada*, 31(3), 102–102.

**ERRATUM**

In the last issue of *Geoscience Canada* (v. 31, no. 2), Figure 1 (p. 59) in the paper by Barry Warner on the Geology of Canadian Wetlands printed with an incorrect pattern in the Hudson Bay Lowlands area. We apologize for this and reproduce the corrected figure below. The whole article and a replacement for page 59 are provided as PDF files under the Geoscience Canada portion of the on the GAC Website at [www.gac.ca](http://www.gac.ca).

**Figure 1.** Distribution of peatlands in Canada (after Tarnocai et al., 2000). The extent of peatland compares well with the wetland map of Canada (Tarnocai et al., 2001), given that about 85% of Canada's wetlands are peatlands. The heavy lines on the map delineate the major drainage basins.
